SAS ACTIVITIES 2019 to acquire transferable skills

Fair Data A to Z

Elena Giglia
University of Turin

Camerino 2019
February 20 from 9.30 am to 4 pm

Geology Department - Room H

FAIR data are the building block of EOSC, the European Open Science Cloud. The future of European research will lay upon FAIR and, when possible, Open data. During our interactive workshop we shall see what FAIR data are and why they differ from Open data. A set of tools to check and FAIRify your data will be presented, with a look at a good data management planning.

The second session will follow the ‘Bring your own data’ format: participants will be encouraged to directly try some of the tools on their own datasets, as practice may differ among disciplines.

9.30 am  Data management: because good research needs good data
Break
11.00  FAIR data in practice: Findable/Accessible
12.00  FAIR data in practice: Interoperable/Reusable
Lunch
2.00 pm  Bring your own data - learning to use the Data Wizard
